

Meet EWI's Advanced Automation Team

EWI's Advanced Automation Process Team develops custom automated solutions for a wide range of manufacturing processes with expertise in automation and controls, robotics, design and simulation, process monitoring, machine vision, and automated inspection, and more.

Ron Brown
Advanced Automation
Technology Leader

Mike Garman
Robotics and Automation

Alex Kitt
Vision Systems and
Automated Inspection

Chris Lee
Software and Hardware
Integration

Connie Reichert LaMorte
Inspection and Control
Systems

Paul Boulware
Sensors and Process
Monitoring

Lance Cronley
Mechanical Design

Jacob Hay
Mechanical Design

Kingsley Gaah
Data Acquisition and
Monitoring

Whether designing new tooling or developing innovative manufacturing processes, our engineers provide one-of-a-kind automated process solutions to improve our clients' operations and help manufacturers improve competitiveness. If you are interested in leveraging the experience of our team of experts for your next project, please contact us at **716.710.5530** and **rbrown@ewi.org**.
